Kaiwen (Kevin) He

Cambridge, MA | khe01@mit.edu | kevin-he-01.github.io | github.com/kevin-he-01

Research Interests

Applied cryptography: I construct efficient cryptographic tools to enhance the security and privacy of everyone.

Education

Massachusetts Institute of Technology — Cambridge, MA
- Ph.D. candidate in Computer Science — Sep 2023 – Current
- M.S. in Computer Science — Sep 2023 – Sep 2025

University of California San Diego — La Jolla, CA
- B.S. in Computer Engineering — Sep 2020 – Jun 2023

Experience

Research Assistant, MIT – Cambridge, MA — Jun 2024 – Current
- First implementation of multi-key homomorphic secret sharing (MKHSS) to appear in IEEE S&P 2026.
- Reduced latency by $45\times$ and memory usage by $3\times$ over state-of-the-art: our scheme performs a multiplication in 5 ms.
- MKHSS enables non-interactive typo-tolerant password-authenticated key exchange in 3.2 seconds.

Research Experiences for Undergraduates, UC San Diego – La Jolla, CA — Jun 2022 – May 2023
- Research paper "Passive SSH Key Compromise via Lattices" published in ACM CCS 2023.
- Collected weekly data from 2^{32} or 4 billion hosts (the entire IP address space).
- Designed a new open source ZGrab 2.0 module with 7829 lines of code to collect data from IPsec hosts.
- Promptly honored all individual data exclusion requests.

Talks

CSAW — New York, NY
Passive SSH Key Compromise via Lattices — November 2024

ACM CCS — Copenhagen, Denmark
Passive SSH Key Compromise via Lattices — November 2023

Awards and Honors

Most notable paper: technical impact, CSAW Applied Research Competition — November 2024
- Paper: Passive SSH Key Compromise via Lattices.

Irwin Mark Jacobs and Joan Klein Jacobs Presidential Fellowship, MIT — September 2023
- Offered to newly admitted Ph.D. students who have demonstrated exemplary academic and research achievements, and thus show great promise for future accomplishments.

SIM San Diego Scholarship, Society of Information Management (SIM) San Diego — October 2022
- Offered to nominated students by SIM San Diego.

Publications

Concretely-Efficient Multi-Key Homomorphic Secret Sharing and Applications — (To appear) May 2026
Kaiwen He, Sacha Servan-Schreiber, Geoffroy Couteau, Srinivas Devadas
IEEE S&P 2026 (to appear)

Passive SSH Key Compromise via Lattices — November 2023
Keegan Ryan, Kaiwen He, George Arnold Sullivan, Nadia Heninger
ACM CCS 2023

Critique of: "A Parallel Framework for Constraint-Based Bayesian Network Learning via Markov Blanket Discovery" by SCC Team From UC San Diego October 2022

Arunav Gupta, John Ge, John Li, Zihao Kong, Kaiwen He, Matthew Mikhailov, Bryan Chin, Xiaochen Li, Max Apodaca, Paul Rodriguez, Mahidar Tatineni, Mary Thomas, and Santosh Bhatt

IEEE TPDS 2022

Skills

Programming Languages: Python, JavaScript, Go, Java, Bash, C, C++, Rust, TypeScript, Kotlin, Assembly.
